FIRES IN NEARBY WOODS.

Flames Threaten the Country Residence of Admiral Dewey.

Trees Alone Damaged, But Lots of Work Given the Local Firemen-Burning of Leaves by Boys Supposed to Have Caused the Trouble.

Many fires of greater or less magnitude In the woods surrounding the city occu-pled the attention of the firemen, police, occasions valuable property, including the chimtry residence of Admiral Dewey, was threatened. In this instance it required the combined efforts of three engine com-panies and as many streams of water to confine the consuming element to the lem Celebrate at Odd Fellows Hall, woods, where the only damage done was The fifteenth anniversary of the the destruction of a number of very big

The firemen were also called out for a fire in the woods in the vicinity of the Prospect Hill Cemetery and soon had the flames subdued. For a large fire across the Eastern Branch of the Potomac the firemen were not called into service, for the reason that there was no water supply for them to draw on to quench the flames. As a consequence the citizens of the vicinity, aided by the police of the job in saving from destruction several litthe houses that were situated in the woods in the path of the fire.

In every instance the fire is supposed to have been started by boys setting small piles of leaves to burn and permitting the flames to get beyond their control. The absence of rain for many weeks past has dried up the leaves and underbrush and it requires but a spark to set the entire

the Woodley Lane road, and spread to the adjoining properties, belonging, respectively, to Admiral Dewe and to the Woodley estate. For a time it threatened to consume the buildings on these properties and was burning in the direction of the residence that was last occupied by ex-President Cleveland.

When the fire was first discovered some workmen who were engaged nearby attempted to beat it out, but were unable to do so. At 12:29 p. m. an alarm was turned in which brought to the scene the chemical engine from Tenleytown. After nearly on bour's work the foreman of that company saw that he was unable to cope with the rapidly spreading tames and a second alarm brought gut engine companies Nos, 5 and 2. Even then the firemen had a hard fight to save the buildings in the path of the flames. It was well on toward dusk before the fire was completely extinguished and the last of the fire companies withdraws.

**Tew minutes before 12 o'clock yesterday, No. 12 Engine Company was called out on a local salarm by J. C. Simpson, of 2234 First Street northwest, for a forest fire in the woods between First and North Capitol and U and W Streets. The

property is owned by the Prospect Hill Cemetery Company. Beyond a slight damage to a wooden fence up harm was done. The fire which had been raging in the woods between the Bowen and Annecesta roads for nearly twenty hours was finally extinguish d late yesterday afternoon through the efforts of the police of the Annecesta sub-station, assisted by a number of eitherns, who had been working all night to save several houses which were threatened with destruction.

The fire started Sunday afternoon from a little biaze on which boys were rossing potatoes, it spread with great rapidity, the wind carrying it in the direction of two houses occupied by Meissrs, Fairley and Hall. The scircity of water greatly hampered the efforts of the citizens who were attracted to the scene. The police did not call out the fire department, as all of the streams are dried up and there is no water supply on which the engines could draw.

and among the other members present were Secretary Gags, Caming stoner Mac-

W. Noyes, W. S. Hutchins, Gen. John M. Wilson, and Thomas F. Walsh.
Reports submitted at the meeting showed that the work of organization has been pressed with such vigor and has met with such encouraging response from every section of the country that the Committee felt justified, at the conclusion of yesterday's session, in adjourning without fixing a time for the next meet-ing. This is the first time that such action has been taken and indicates the confidence felt by the members of the Committee that the work is progressing favorably, and that the routine business of the undertaking can be readily attended to by the officers of the Associa-tion, to whom have been delegated gen-eral powers of this nature. The next meeting of the Executive Committee, therefore, will be at the call of the chair, some time later in the week, in all prob-

Secretary Walsh reported the acceptances, as State and City Vice Presidents, of Senator Mitchell, for Oregon, Senator Kittridge, for South Dakota, Representa-tive Newlands, for Nevada, Governor Otero, for New Mexico, Mr. Andrew Simonds, for Charleston, S. C., and Mr. Denn Soge, for Albany, N. Y.

At the beginning of the work the mem-bers of the Executive Committee hardly realized the magnitude of the task of constructing a national organization for popular subscription, to cover the United States, even with the simple machinery which it devised for extending to all classes its invitation to contribute. Even though the amount which it was proposed to raise was relatively small when compared with the population and prosperty of the country and the unexampled affec-tion of the people for the late President McKinley, the members of the Executive Committee found that a comprehensive and thorough organization would be nec details of the plan preposed.

The work has been gotten into such exrelient condition now, however, that the members of the committee will not have to devote as much time to the work every day as they have been doing for the past

At the meeting yesterday afternoon, Mr. Macfariand and Mr. Walsh, respectively the President and Secretary of the Association, reported informally the sub-stance of their conference, at the White Liouse last Friday afternoon, with Semtor Hanna and Secretary Correlyou, of the Board of Trustees of the association for creeting a monument at Canton. There was a general exchange of views as to the best methods for preserving that har-mony which all desire between the Arch Association and the association for the Canton measurement. At the next meeting of the coamiltee figither consideration will be given to this subject, as a therough understanding by each association of the work of the other is considered one of the prime requisites for the suc-cess of both projects.

Counterfeits.

Read what one of the GREATEST NEWSPAPERS IN AMERICA has to say on this subject:

"The manufacturers of Castoria have been compelled to spend hundreds of thousands of dollars to familiarize the public with the signature of Chas. H. Fletcher. This has been necessitated by reason of pirates counterfeiting the Castoria trademark. This counterfeiting is a crime not only against the proprietors of Castoria, but against the growing generation. All persons should be careful to see that Castoria bears the signature of Chas. H. Fletcher, if they would guard the health of their children. Parents, and mothers in particular, ought to carefully examine the Castoria advertisements which have been appearing in this paper, and to remember that the wrapper of every bottle of genuine Castoria bears the fac-simile signature of Chas. It was explained that in April, 1909, the American Autocarette Company entered into a contract with the Automobile and Manufacturing Company, of Baltimore, Md. for the construction of ten "autocarettes" or "automatic cars." It was stated that by the terms of the agreement the defendant was to have delivered five of the machines in Washington in good onder to the complainant, on July 18, 1909. Two of the cars, il was said, were received on July 22, 1909, and the remainder of the in lots of two and three between that time and December 1, 1909. It was further alleged that the machines were not satisfactory, and the defendant, it was stated, represented to the complainant that it needed money, and if it would alvance a certain sum the defects in the machines would be remedied. On his representation, it was stated, the complainant on July as stated, represented to the complainant that the card because of the cars, it was satisfactory, and the defendant, it was stated, represented to the complainant that the card because of the cars in the machines would be remedied.
